

## Electric Timer Module 15 Channel – 22 Pin Connector Pin-Out

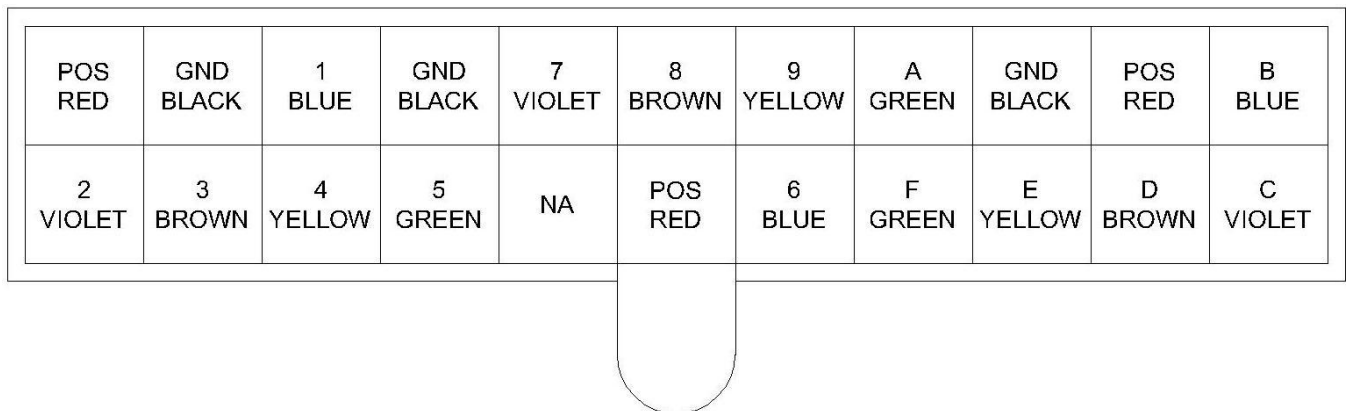

By Electrimotion, Inc

### 22 Pin Output Connector

A 22-pin connector supplies the output from the timer module. This connector provides connections to all 15-output channels and access to 12 volt and ground connections. The following diagram provides descriptions for each port of the 22-pin connector. Each pin location has the standard wire color listed.

Label	Description
POS	Positive 12volt
GND	Common Ground
1 – 9	Channels 1 through 9 Outputs
A-F	Channels A through F Outputs
NA	No Connection

The diagram represents pin locations looking at the box, or from the wire side of the mating connector.
